1 Student registration – 6 Hours.....4

1 Student registration to UAP– 6 Hours

Use Case ID:	UC-21	Version:	2.0
Use Case Name	Student registration to UAP		
Platform Details:	Pega 8.4	Time for completion	6 Hours
Created By:	Jayanta Dey	Last Updated By:	Sarada Satapathy
Date Created:	13-02-2020	Last Revision Date:	30-12-2020
Description:	TSP is a college with 5000+ students. They want to use a Pega8 application to automate their student registration process. Any student who wants to apply should be able fill the necessary information for registration request. The student should fill the necessary information, based on the input from the student next options should be automatically displayed. Once the submission of the request is made the confirmation mail should be triggered to the student.		
Actors:	Student: A non-registered student should able to initiate the registration request.		
Mockup screens:	 The mockup shows a 'Registration' form with two main sections: 'Personal information' and 'Address information'. The 'Personal information' section includes fields for 'Firstname', 'Lastname', 'Phone' (with a sample number '(541) 754-3010'), and 'Email' (with a sample email 'john.johnson@gmail.com'). The 'Address information' section includes fields for 'Address1', 'Address2', 'Country' (with a dropdown menu showing 'USA'), 'State' (with a dropdown menu showing 'California'), 'City' (with a dropdown menu showing 'Sacramento'), and 'ZipCode'.		
Trigger:	Any user accessing the portal can click on the Student Registration button on home screen to start/initiate the process.		
Preconditions:	User need not be logged in Sample data: as provided in the table below		
Post conditions:	Student receives an email confirmation about successful registration of UAP.		

Normal Flow:	 <pre> graph TD Start(()) --> Registration[Student Registration] Registration --> Email[Send confirmation email] Email --> End((())) </pre> - Any user accessing the portal can click on the Student Registration button on home screen to start/initiate the process - The Student registration screen is presented (exactly as in the mock-up) - The user can choose the country from a list of provided options. - Once a valid country is chosen, the state drop-down get enabled and shows the relevant states for the selected country - Once a valid state is selected, the city drop down gets enabled and relevant cities from that state are populated in the drop down. - Student need to provide the ZIP/Pin Code. - As soon as the ZIP/Pin Code is provided by the student and he/she tabbed out, one more section should be visible below Address Information. This section shows up the location and Landmark as per the database. - The student submits the form and a success message gets generated - An email about successful registration is sent to the student email ID - The student should log out from the application and a modified Logout screen must be visible
Exceptions:	All drop downs are mandatory, and any data mismatch must prevent submission of the user registration
Includes	N/A
Special Requirements:	Employee should be able to access the application using a mobile device as well. ie. The screens should be responsive.
Assumptions:	N/A

Sample Data:

Country	State	City	ZIP/Pin Code	Location	LandMark
